The challenges of designing a new space for her clients are many, but with 28 years of experience, a Bachelor of Science degree in Interior Design, and a love for what she does, Debra May Himes shoulders those challenges with knowledge and passion.

The art of kitchen design has been propelled into the 21st century with the introduction of chic appliances like Sub-Zero refrigerators and Dacor warming drawers... a far cry from the kitchens of our childhood. While the kitchen has long been a place to gather with family and friends, it has now become a dramatic focal point of the entire home. No longer willing to settle for the ordinary, Himes' clients crave originality. If they can't find what they want on a showroom floor or in a catalogue, Himes will fashion a fresh idea – so is the case of the custom-designed hood in this kitchen. Created in brushed stainless steel and hammered pewter with copper clavos to accentuate copper trim on the handles of the range, this is truly one-of-a-kind.
